Migrating Legacy Systems to SOA Environments
eLearning Course—Guidance in a Convenient, Low-Cost Format

Do you know whether SOA can really support your business or mission objectives?

Do you know what it will take to migrate your legacy systems to a SOA environment?

Do you face constraints that prevent you from traveling for training?

Who Will Gain Most from this Course

- Technical managers, managers, and software engineers who
    - need a solid overview of what SOA really involves
    - are considering legacy system migration to SOA environments
- Individuals who
    - make decisions about SOA strategy and implementation
    - need to develop and deploy service-oriented systems

Service-oriented architecture (SOA) has been touted as a solution to meet the challenge of rapid change in commercial, government, and military software environments.

Certainly, SOA has great potential. It is a way to design, deploy, and manage systems that enables cost efficiency, agility, adaptability, and leverage of legacy investments.

But before adopting SOA as a development and operational paradigm, an organization needs to gain a realistic understanding of its potentials and pitfalls.

Course Explains SOA, Outlines Migration Approach

The Software Engineering Institute (SEI) can help you understand SOA and decide how to adopt it effectively in your organization.

In our *Migrating Legacy Systems to SOA Environments* course, you will learn

- basic SOA concepts
- common misconceptions about SOA
- fundamentals for successfully adopting SOA
- potential issues in migrating legacy systems to SOA environments
- a technique for analyzing the potential of reusing legacy systems in SOA environments

Take this Essential Training at Home or In Your Office, at Your Own Pace

To accommodate your busy schedules, we are offering this course in an online format—so that you can choose to focus your greatest attention on the material that is most unfamiliar to you and learn at your own pace.

Interact with SEI Experts

The course offers 10 hours of lecture videos, transcripts, and self-assessments to help reinforce your learning. You can interact with your course instructor via email to receive examples of concepts and other help, and you can participate in forums and interact with instructors and other students who are taking the course.

Save on Course Registration— Just $400

You'll save two ways. First, because this course is offered online, you won't have travel expenses. Second, the course registration is just $400, a fraction of the typical cost of in-class offerings.
