

FloCon[®]2013

www.flocon.org

FloCon 2013, a network security conference, takes place in Albuquerque, New Mexico, on January 7–10, 2013. This open conference provides a forum for operational network analysts, tool developers, researchers, and other parties interested in the analysis of large volumes of traffic to showcase the next generation of flow-based analysis techniques.

Call for Papers

For FloCon 2013, we are accepting abstracts for presentations, posters, and demonstrations for network analysis with an eye toward applications and adaptations for analysis at scale. Topics of interest include

- Measurement and metrics
- Discovering and evaluating indicators of malicious behavior
- Automated analysis
- Flow collection technology
- Augmenting and annotating flow data
- Integrating data sources
- Optimizing analyst workflow
- Scalable statistical techniques
- Data visualization for operational environments and reporting
- Case studies in threat detection and mitigation
- Data fusion
- New techniques from new data sources

Presentations should be prepared for a technical audience; presenters are allotted 30 minutes, including time for questions. There is also an option to submit academic posters that highlight novel techniques and early results from new directions. The demonstration session provides an opportunity for informal interaction with the community and a forum to display new technology and new platforms. There will be a dedicated session and room for demonstrations and posters. The demonstrations can take place throughout the sessions, as the attendees move about the room.

Since the workshop is intended to be highly interactive, presenters and demonstrators must have enough experience and in-depth knowledge about flow analysis to address questions from other attendees.

Presentations and posters will be selected by the program committee based on a blind review against established selection criteria. Demonstration slots will be assigned first to FloCon 2013 sponsors; remaining slots will be filled on a first-come, first-served basis. A limited number of registration fee discounts are available to students who present or demonstrate relevant flow-related research.

To submit an abstract, please use our online Call for Presentations Submission Form (available at www.flocon.org).

Important Dates

- Abstract Submission Deadline
September 7, 2012
- Notification of Acceptance
October, 12 2012
- Final Paper Due
November 16, 2012
- Conference
January 7–10, 2013
