

# Protect Your Organization from Insider Threats

Become part of a global network of trusted providers

## **DO YOU WANT ASSESSORS ON STAFF**

who measure how prepared an organization is to prevent, detect, and respond to insider threats? Become an SEI Partner for Insider Threat Vulnerability Assessments and sponsor a candidate assessor to establish this capability in your organization.

## **Defend Against Insider Threats**

The Insider Threat Vulnerability Assessor (ITVA) authorization enables assessors to help organizations gain a better understanding of their insider threat risk and an enhanced ability to identify and manage associated risks. The assessment methodology assists organizations by measuring how prepared they are to prevent, detect, and respond to the insider threat.

## **Growing Demand**

The need for qualified experts to support organizations in the development and operation of insider threat programs is now greater than ever.

Partnering with the SEI and sending your employees to our certificate programs to gain ITVA authorization will help you meet your demand and comply with all the requirements.

## **Compliance**

Executive Order 13587 mandates that federal agencies operating or accessing classified computer networks implement an insider threat detection and prevention program.

Also, changes to the National Industrial Security Program Operating Manual (NISPOM) require the same of contractors that engage with such federal agencies. Leverage your organization's authorized assessors to help you comply with these critical requirements.

## **Partner with Us**

As an SEI partner, your authorized assessors perform insider threat vulnerability assessments, giving your organization the tools and techniques it needs to improve its preparedness to defend against insider threats. You can also license the CERT ITVA toolkit for internal use or to assess others—such as your suppliers—for potential vulnerabilities. The ITVA toolkit includes templates and briefing examples, the capability to produce semi-automated summary reports of findings, and a marketing kit containing the SEI Partner Network identity guidelines. In addition, your organization's business point of contact receives access to the self-service SEI Partner Directory application for managing your organization's profile for display in the publicly available SEI Partner Directory.

## Benefits of Becoming an SEI Partner

As an SEI Partner, you'll join an elite group of organizations on the leading edge of software engineering and cyber threat protection. You'll share in SEI, CERT, and Carnegie Mellon University's pioneering work and influence the direction of research. Becoming a Partner enables you to access the latest cybersecurity and software engineering research. SEI Partners are the only source for authentic SEI services outside of the SEI.

### Grow and improve your organization or help your customers

Give your organization and clients the tools and techniques they need to

- identify issues impacting their insider threat risk
- design and implement tactical countermeasures
- formulate a strategic action plan for long-term risk mitigation

SEI tools can help you and your customers

- understand and prevent insider threats
- reduce risks from software vulnerabilities
- safeguard critical assets
- increase network and system resilience

SEI Partners also have special access to products, materials, marketing tools, training, discounts, technical support, lead generation, tools, and pilot opportunities.

## Connect your services to our reputation

The SEI, its CERT Division, and Carnegie Mellon University are pioneers and leaders in software engineering and cybersecurity. SEI tools and methods help you provide stability and consistency that customers can trust.

As an SEI Partner, you can use proven SEI technologies that can yield dramatic improvements in organizations and teams. And you can take advantage of tools that the SEI has developed and refined over the past 30 years.

## Join Us

Apply to join the SEI Partners authorized to perform CERT Insider Threat Program Evaluations to assist organizations in making their organizations better equipped to prevent, detect, and respond to insider threats.
