

SEI BULLETIN - NOVEMBER 30, 2016

## FloCon 2017 Announces Conference Program and Keynote

FloCon 2017, the 13th annual open forum for large-scale network analytics, has announced its full technical program and keynote speakers for the conference, to be held January 9-12, 2017, in San Diego. FloCon is sponsored by the CERT Division of the Software Engineering Institute at Carnegie Mellon University. FloCon is the only conference that focuses on network flow analysis—gleaning security information from compact summaries of network traffic and connections.

Showcasing next-generation techniques, FloCon is geared toward operational analysts, tool developers, researchers, and others interested in applying the latest analytics against large volumes of traffic.

The keynote speaker at the conference will be Patrick M. Sullivan, executive director, Space and Naval Warfare Systems Command, whose talk is titled “Delivering Cyber Warfighting Capability from Seabed to Space.”

#### ABOUT THE SEI BULLETIN

The SEI Bulletin is a biweekly newsletter designed to keep you up to date on SEI news, events, research, and other matters of interest to the SEI community. We hope you find the SEI Bulletin useful and informative.

#### SEND US YOUR STORY

Do you have a story about how an SEI technology has positively affected your team or organization? If so, the SEI would like to hear about it. Send a short summary of your success to [info@sei.cmu.edu](mailto:info@sei.cmu.edu) and you could be featured in a future issue of the SEI Bulletin.
