SEI Bulletin — March 7, 2018

SEI Launches New Website

New site features improved navigation, organization, and visual appeal

The SEI has launched an updated version of its website, www.sei.cmu.edu. The new website features an improved user experience, which includes navigation and organization, streamlined content, and more visual appeal. The new design also consolidates content from our flagship websites www.sei.cmu.edu and www.cert.org into the SEI domain.

Note that the SEI's CERT Division will continue to perform its important cybersecurity research and development, and that the CERT resources you rely on, such as the [Vulnerability Notes Database](#), our [digital library](#), and the [CERT/CC Blog](#), will remain available on the redesigned site.

We hope the new www.sei.cmu.edu will enhance your experience and connect you with the SEI resources you need, quickly and efficiently.

About the SEI Bulletin

The SEI Bulletin is a biweekly newsletter designed to keep you up to date on SEI news, events, research, and other matters of interest to the SEI community. We hope you find the SEI Bulletin useful and informative.

Send Us Your Story

Do you have a story about how an SEI technology has positively affected your team or organization? If so, the SEI would like to hear about it. Send a short summary of your success to info@sei.cmu.edu and you could be featured in a future issue of the SEI Bulletin.
