SEI Bulletin — October 17, 2018

New CERT Tool Speeds Artifact Extraction and Analysis

The SEI's CERT Division has released Cyobstract, an open source incident response tool. Cyobstract is designed to help analysts quickly and efficiently extract artifacts from any textual source or collection of sources, such as incident reports and threat assessment summaries. The tool is freely available on GitHub.

About the SEI Bulletin

The SEI Bulletin is a biweekly newsletter designed to keep you up to date on SEI news, events, research, and other matters of interest to the SEI community. We hope you find the SEI Bulletin useful and informative.

Send Us Your Story

Do you have a story about how an SEI technology has positively affected your team or organization? If so, the SEI would like to hear about it. Send a short summary of your success to info@sei.cmu.edu and you could be featured in a future issue of the SEI Bulletin.

Our mailing address is

Software Engineering Institute | Carnegie Mellon University | 4500 Fifth Avenue, Pittsburgh, Pa. 15213
