Software Engineering Institute Names Leading Cybersecurity Researcher as CTO

On November 1, the Software Engineering Institute announced the appointment of nationally known cybersecurity researcher Dr. Tom Longstaff as chief technology officer (CTO). As CTO, Longstaff will formulate a technical strategy and lead the funded research program of the institute based on current and predicted future trends in technology, government, and industry. Prior to joining the SEI, Longstaff most recently served as a program manager and principal cybersecurity strategist for the Asymmetric Operations Sector of the Johns Hopkins University Applied Physics Laboratory (APL), where he led projects on behalf of the U.S. government, including nuclear command and control, automated incident response, technology transition of cyber R&D, information assurance, intelligence, and global information networks.

About the SEI Bulletin
The SEI Bulletin is a biweekly newsletter designed to keep you up to date on SEI news, events, research, and other matters of interest to the SEI
community. We hope you find the SEI Bulletin useful and informative.

**Send Us Your Story**

Do you have a story about how an SEI technology has positively affected your team or organization? If so, the SEI would like to hear about it. Send a short summary of your success to info@sei.cmu.edu and you could be featured in a future issue of the SEI Bulletin.
