## SEI-ACE Implementation Supports Secure IoT in Edge Environments

The SEI has released an implementation for authentication and authorization of Internet of Things (IoT) devices for use in edge environments. As part of the SEI's mission to transition the technologies it develops to the larger software engineering community, the SEI has made this implementation, [SEI-ACE](#), freely available in its open-source code repository on GitHub.

## About the SEI Bulletin

The SEI Bulletin is a biweekly newsletter designed to keep you up to date on SEI news, events, research, and other matters of interest to the SEI community. We hope you find the SEI Bulletin useful and informative.

## Send Us Your Story

Do you have a story about how an SEI technology has positively affected your team or organization? If so, the SEI would like to hear about it. Send a short summary of your success to [info@sei.cmu.edu](mailto:info@sei.cmu.edu) and you could be featured in a future issue of the SEI Bulletin.
