SEI Bulletin — February 20, 2019

Leading in the Age of Artificial Intelligence

In this SEI Podcast, Tom Longstaff, who was hired as the SEI's chief technology officer in 2018, discusses the challenges of leading a technical organization in the age of artificial intelligence. "The more I talked about the SEI, the more I got excited about what the possibilities were here, what we could achieve, what we could actually do and move forward in this new world where software is the ocean that everything swims in," Longstaff told interviewer Eileen Wrubel during the podcast.

As CTO, Longstaff is responsible for formulating a technical strategy and leading the funded research program of the institute based on current and predicted future trends in technology, government, and industry.

About the SEI Bulletin

The SEI Bulletin is a biweekly newsletter designed to keep you up to date on SEI news, events, research, and other matters of interest to the SEI community. We hope you find the SEI Bulletin useful and informative.

Send Us Your Story

Do you have a story about how an SEI technology has positively affected your team or organization? If so, the SEI would like to hear about it. Send a short summary of your success to info@sei.cmu.edu and you could be featured in a future issue of the SEI Bulletin.

Our mailing address is

Software Engineering Institute | Carnegie Mellon University | 4500 Fifth Avenue, Pittsburgh, Pa. 15213
