CERT Division Releases Six Free Cyber Simulation Tools; Introductory Webcast March 13

The SEI's CERT Division has released a suite of open source and freely available tools for use in creating realistic Internet simulations for training and other purposes. The tools' creators will introduce the suite in a free webcast, Helping You Reach the Next Level of Security: 6 Free Tools for Creating a Cyber Simulator, on March 13 at 1:30 p.m. Eastern Daylight Time. This release continues the SEI's practice of making open-source tools publicly and freely available for use by the software engineering community and others.

The SEI developed this set of prototype tools to improve the realism, efficiency, and cost-effectiveness of cybersecurity training. These tools are used in training and exercises it delivers on behalf of its sponsors, including the Department of Defense, the FBI, the NSA, and other agencies.

Recently, the SEI's sponsors approved the release of some of these tools as open-source software, packaged binaries, or virtual appliances.

To download these tools, visit http://www.sei.cmu.edu/go/cwd-tools for source code and documentation, executables, and virtual machine .ova

images.

To register for the March 13 webcast, visit https://www.sei.cmu.edu/news-events/events/Event.cfm?customel_datapageid_5541=176761.

About the SEI Bulletin

The SEI Bulletin is a biweekly newsletter designed to keep you up to date on SEI news, events, research, and other matters of interest to the SEI community. We hope you find the SEI Bulletin useful and informative.

Send Us Your Story

Do you have a story about how an SEI technology has positively affected your team or organization? If so, the SEI would like to hear about it. Send a short summary of your success to info@sei.cmu.edu and you could be featured in a future issue of the SEI Bulletin.
