# National Insider Threat Awareness Month 2019

SEI Bulletin — September 4, 2019

## SEI Research Supports National Insider Threat Awareness Month This September

In the coming weeks, the SEI's CERT National Insider Threat Center (NITC) will release new information on its research to coincide with National Insider Threat Awareness Month, including a live webinar September 19 at 1 p.m. EDT titled [Insider Threats: Your Questions. Our Answers](#). The CERT NITC will also release [new blog posts](#) and a Cyber Minute video on insider threat mitigation. A number of federal agencies, including the FBI, Office of the Undersecretary of Defense (Intelligence), and Department of Homeland Security, have chosen September to spotlight the risks insiders pose to national security.

“During the month of September,” said Randy Trzeciak, director of the CERT NITC, “we will work alongside the sponsoring organizations to raise awareness of the need to incorporate insider threat mitigation into existing security programs. We'll provide actionable guidance for building, implementing, operating, and measuring program effectiveness. And we'll highlight the great work that has been done across the DoD, U.S. government, law enforcement, industry, and academia in this domain.”

## About the SEI Bulletin

The SEI Bulletin is a biweekly newsletter designed to keep you up to date on SEI news, events, research, and other matters of interest to the SEI community. We hope you find the SEI Bulletin useful and informative.

## Send Us Your Story

Do you have a story about how an SEI technology has positively affected your team or organization? If so, the SEI would like to hear about it. Send a short summary of your success to [info@sei.cmu.edu](mailto:info@sei.cmu.edu), and you could be featured in a future issue of the SEI Bulletin.
