SEI Team Wins 2019 ISLA Award

A team of SEI technical staff members has received the 2019 Information Security Leadership Award (ISLA[®]) Government, in the category of Most Valuable Industry Partner (Team). (ISC)², the information technology security professional organization best known for the Certified Information Systems Security Professional (CISSP[®]) certification, gives the ISLA Government award to “a U.S. federal, state or local contractor or consultant team (currently supporting a government contract) whose project or initiative has significantly contributed to the advancement of information security in the areas of information security workforce, policy, process or technology.”

The award recognized the SEI team’s technical guidance and research performed for the Department of Defense’s (DoD) Joint Federated Assurance Center (JFAC), which supports software and hardware assurance efforts across the DoD. Over two years, the SEI team developed a pair of guidebooks on software assurance at the DoD.

About the SEI Bulletin

The SEI Bulletin is a biweekly newsletter designed to keep you up to date on SEI news, events, research, and other matters of interest to the SEI community. We hope you find the SEI Bulletin useful and informative.

Send Us Your Story

Do you have a story about how an SEI technology has positively affected your team or organization? If so, the SEI would like to hear about it. Send a short summary of your success to info@sei.cmu.edu, and you could be featured in a future issue of the SEI Bulletin.

Our mailing address is

Software Engineering Institute | Carnegie Mellon University | 4500 Fifth Avenue, Pittsburgh, Pa. 15213
