Software and Systems Collaboration in the Era of Smart Systems

March 16, 2022 — A new podcast features SEI CEO and Director Paul Nielsen talking about how the advent of smart systems has led to a growing need for effective collaboration between the disciplines of systems engineering and software engineering. The discussion with SEI principal researcher Suzanne Miller covers artificial intelligence, machine learning, and Agile business processes, among other topics.

“The work that has been ongoing with DevOps, which leads to smaller incremental changes, but very rapidly, helps tame this exponential growth in science and technology,” said Nielsen in the podcast. Long-term system planning is easier when broken down to Agile sprints or DevOps quick development cycles. "It is much easier to tame the future because you can see that far."

Watch the video on our website or YouTube. Find the SEI Podcast series wherever you get your podcasts: Apple Podcasts, Google Podcasts, TuneIn, SoundCloud, Stitcher, or Spotify.

**Upcoming Events**

**Ask Us Anything: Zero Trust Edition**, March 18
In this free webcast, SEI CERT Division Director Greg Touhill and Dr. Chase Cunningham, chief strategy officer at Ericom Software, take your questions and discuss what you need to implement a Zero Trust strategy.

**DevSecOps Days 2022 Pittsburgh**, April 27
This free, virtual event gives you the opportunity to elevate how you integrate security into your DevOps practices and transform your DevSecOps journey.

**AADL/ACVIP User Days 2022**, May 5
Speakers at this free forum will present the latest on the Architecture Analysis and Design Language (AADL), the Architecture-Centric Virtual Integration Process (ACVIP), and associated tools.

**International Conference on Software and Systems Processes 2022**, May 20-22
This conference gathers researchers and practitioners to share about software and system processes and global software engineering.
