

# Navigating DevOps Requirements with Risk Management

Victoria Hailey

## DEV OPS REQUIREMENTS

Volume + Velocity + Variety + Veracity + Volatility + Visibility + Variability + Value + Validity + Visualization + All the business reqs.

- + Confidentiality
- + Integrity
- + Availability
- + Privacy

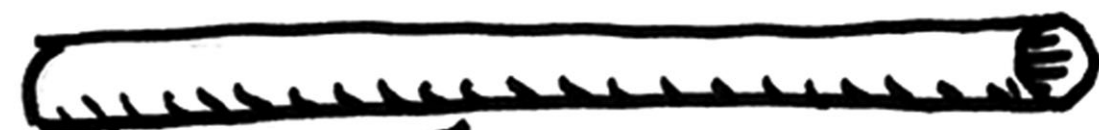

Standards are a tool of the trade  
- How do we know...

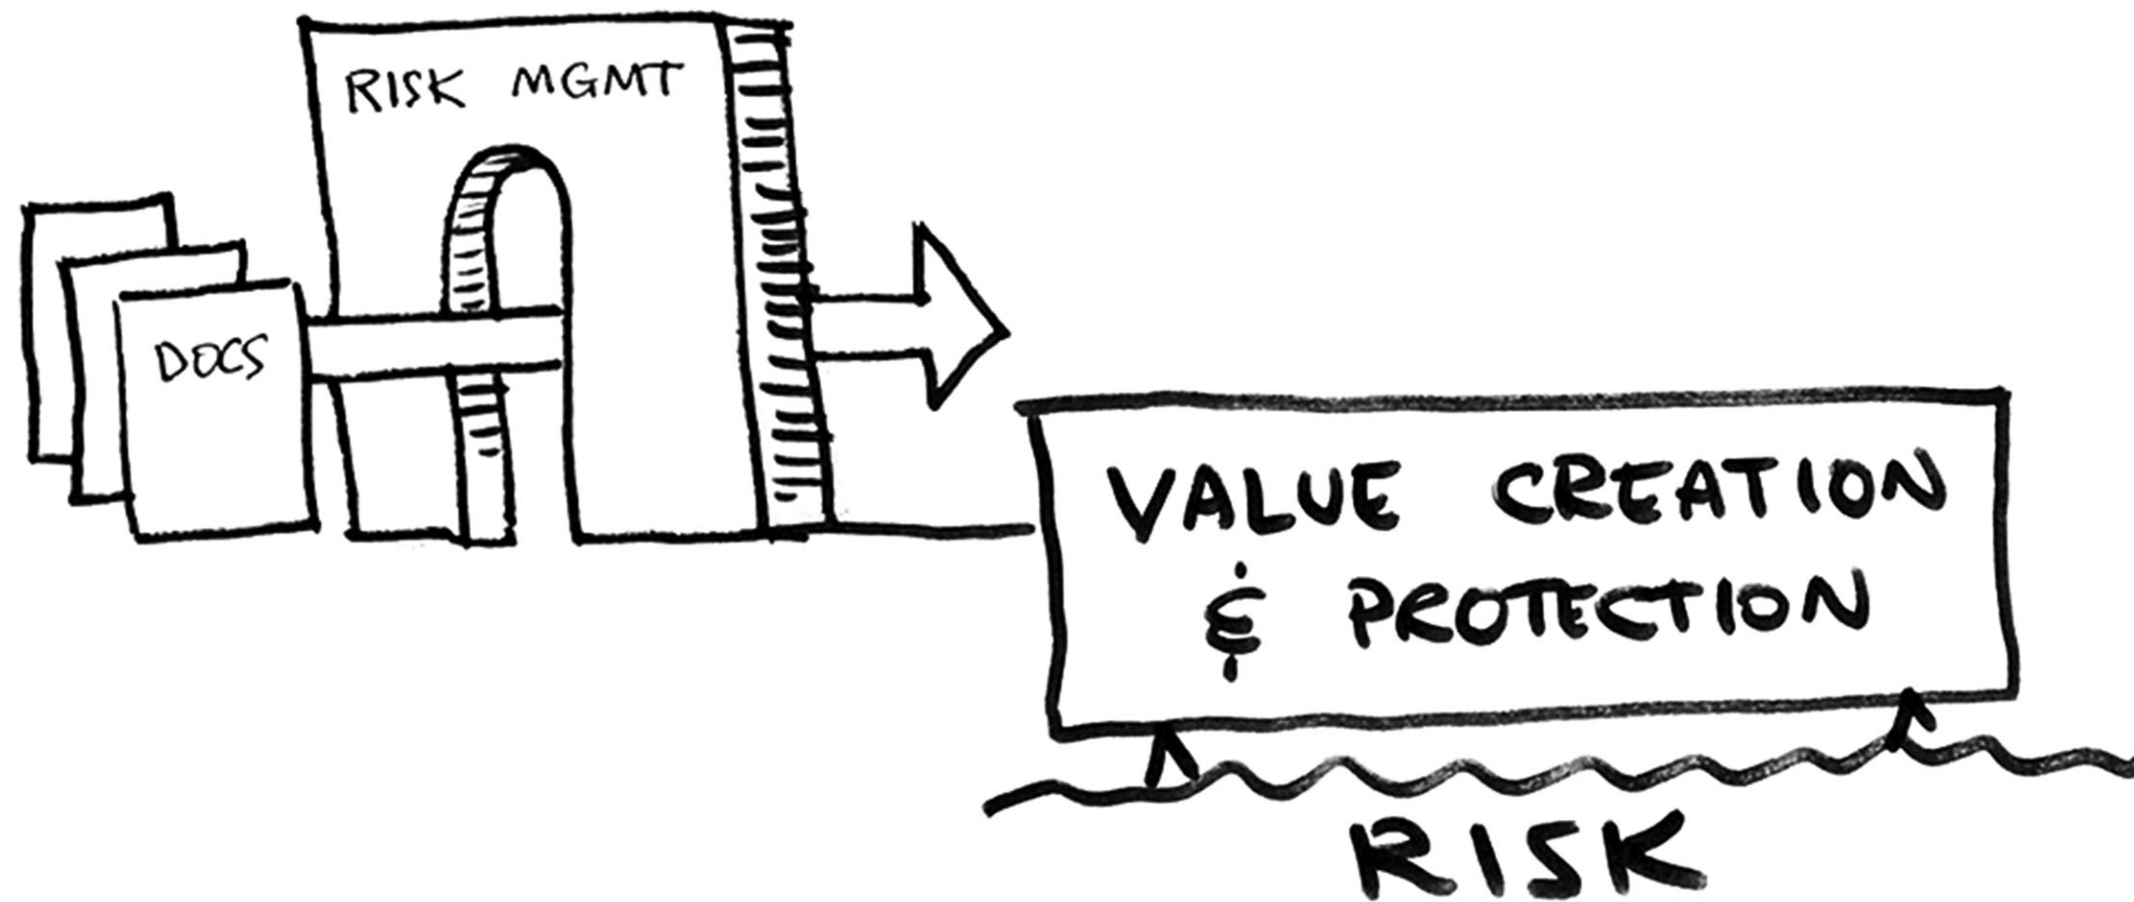

We are still in the early stages of achieving DevSec Ops objectives

**RISK FRAMEWORK  
KEEPS EVERYONE ON  
THE SAME PAGE**

DEV OPS or DEV SEC OPS  
"Sec Dev Sec Ops Sec"  
is too hard to say

Where does security enter the pipeline?

**HIGHER CAPABILITIES  
REQUIRED!**

Outcomes only met by managing the risks
