Software Engineering Workshop for Educators Returns for 20th Anniversary

May 10, 2023—The SEI will host its annual gathering for college-level teachers from August 1-3. The Software Engineering Workshop for Educators fosters an ongoing exchange of ideas among educators whose curricula include subjects spanning software engineering, computer science, and related fields.

"A lot has changed in 20 years, and we are eager to engage educators in a discussion on what has, and should, stay the same and how the workshop should evolve to address future needs," said Robert Nord, principal member of the SEI staff and event co-facilitator.

The event will feature programming on cyber forensics, incident response, experiential learning, supporting neurodivergent students, and the workshop's history. Registration for in-person attendance is open now through July 25. Registration for virtual attendance ends July 28.
