New SEI Course Teaches How to Develop a National or Government CSIRT

July 31, 2024—A new SEI course on developing a computer security incident response team (CSIRT) for national or government organizations will debut October 8-9, live online. The course is intended for those responsible for developing a national or government CSIRT, managers and project leaders of other types of CSIRTs, C-level managers, and those in organizations that interact with national or government CSIRTs.

Lectures and group exercises will teach how to identify CSIRT enablers and resources, characterize stakeholders, create implementation strategies and plans, describe evaluation methods, and implement process improvements, among other objectives.

“The SEI has over 20 years of experience, engagement, and collaboration with national and government CSIRTs,” said James Lord, technical manager of security operations in the SEI’s CERT Division. “We understand the challenges associated with sharing information and implementing tools,
techniques, and strategies that address problems unique to CSIRTs that are responsible for a nation or economy.”

Upcoming Events

Secure Software by Design, August 6-7
Collaborate on improving software security with two on-site days of panel discussions and presentations plus two optional on-site days of training.

Insider Risk Management Symposium 2024, August 14
Join us to hear about the latest challenges and best practices in insider risk management from recognized leaders in insider threat research and development.

DevSecOps Days Washington D.C. 2024, September 18
This free, in-person event in Arlington, Virginia, will teach how to integrate security into DevOps practices and transform DevSecOps journeys.

International Conference on Conceptual Modeling (ER 2024), October 28-31
The SEI will host the main international forum for discussing the state of the art, emerging issues, and future challenges in research and practice on conceptual modeling.

Upcoming Appearances

Emerging Technologies for Defense Conference & Exhibition 2024, August 7-9
Visit the SEI at booth 316.

Billington CyberSecurity Summit, September 3-6
Hear the SEI’s Mark Sherman at the leading government cybersecurity summit.

27th Annual Systems & Mission Engineering Conference, October 28-31
Visit the SEI booth at this event.
**Upcoming Training**

**Developing a National or Government CSIRT**
October 8-9 (SEI Live Online)

**Insider Risk Management: Measures of Effectiveness**
October 29-31 (SEI Live Online)
